MahadhanAmruta 12:61:0 (Mono Ammonium Phosphate (MAP))

Mahadhan12:61:00 (water soluble fertilizer)

i) What nutrients does it contain?

- N & P

ii) What is it & how does it help in crop nutrition?

- Mono ammonium Phosphate
- Low in Nitrogen, but rich in Phosphorus.
- Useful for new root growth and faster vegetative growth.
- Promotes proper growth of reproductive parts and fertilization.

iii) How does it benefit farmers?

- Farmers get higher yields and increased incomes because of reduced flower drop and increased fruit setting.

iv) What are the crops in which farmers could use it?

- Through fertigation: Grapes, Pomegranate, Banana, Cotton, Tomato, Onion, Sugarcane, Ginger, Turmeric, Watermelon, Floriculture, Protected cultivation
- Through foliar application: All crops
