Mahadhan Chetak - Di Ammonium Phosphate (DAP)

What nutrients does it contain?

- Nitrogen & Phosphorus

ii) What is it & how does it help in crop nutrition?

- Contains 18 % Nitrogen + 46 % Phosphorus
- DAP contains high water soluble phosphorus that enhances root growth and in turn good crop stand

iii) How does it benefit farmers

- Nitrogen and Phosphorus ratio are best suited for Pulse and Oilseed crop
- High Water Soluble Phosphorus helps in enhanced root growth and in turn good crop stand
- Increase flower number and fruit setting, thereby the quality and crop yield
- Well Suited for calcareous and alkaline soils

iv) What are the crops in which farmers could use it?

- Sugarcane, Cotton, Oilseeds and Pulse crops
